

Clinical Skills

Quick Reference Card

Elsevier Clinical Skills combines over 2,000+ detailed, evidence-based skills with competency management features to provide an engaging learning experience that helps you refresh your knowledge or learn entirely new skills.

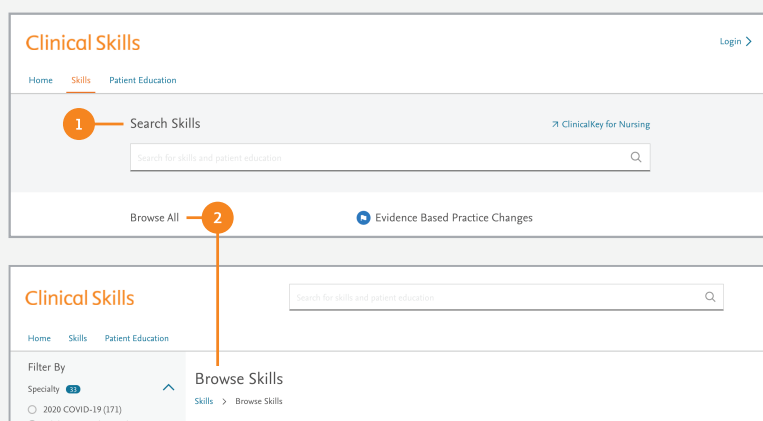

How to use Clinical Skills referentially:

1 Search

Enter a [search term](#) to search for the skill. You can go directly to the skill you are looking for from the search suggestions or you can hit enter and see a full list of search results. Using the filters on the left, you can refine your results by age-specific population, specialty, and category.

2 Browse

There are multiple ways you can [browse skills](#) from the landing page. You can view Skills that have had recent evidence based practice changes, or browse by specialty and category. If you would like to browse all skills you can do so by clicking “All Skills” under the “Browse All” heading.

Access on your mobile device

Follow these steps to use the mobile version of Skills at your organization.

- From a laptop or desktop computer, open Skills. Do not log in.
- From the browser, email the URL to yourself.
- From your phone or tablet, find that email and click the link for Skills.
- Add Skills to your home screen or bookmark it.
- You can now use Skills on your mobile device.
